Building for the energy revolution

Meeting our energy needs sustainably into the future requires an energy revolution. For the built environment, our greatest opportunity lies in the promotion of an approach to building, supplemented by renewable energies.

Several regions already successfully support this approach on the basis of the Passive House Standard and are leading the way towards a sustainable future. Many more aspire to get on board...

14 Partners. 11 Countries. 3 Years. 1 Goal.
Supporting the growth of Passive House regions
