A study tour through Passive Exemplary Buildings with Renewables in Brussels Capital Region

during

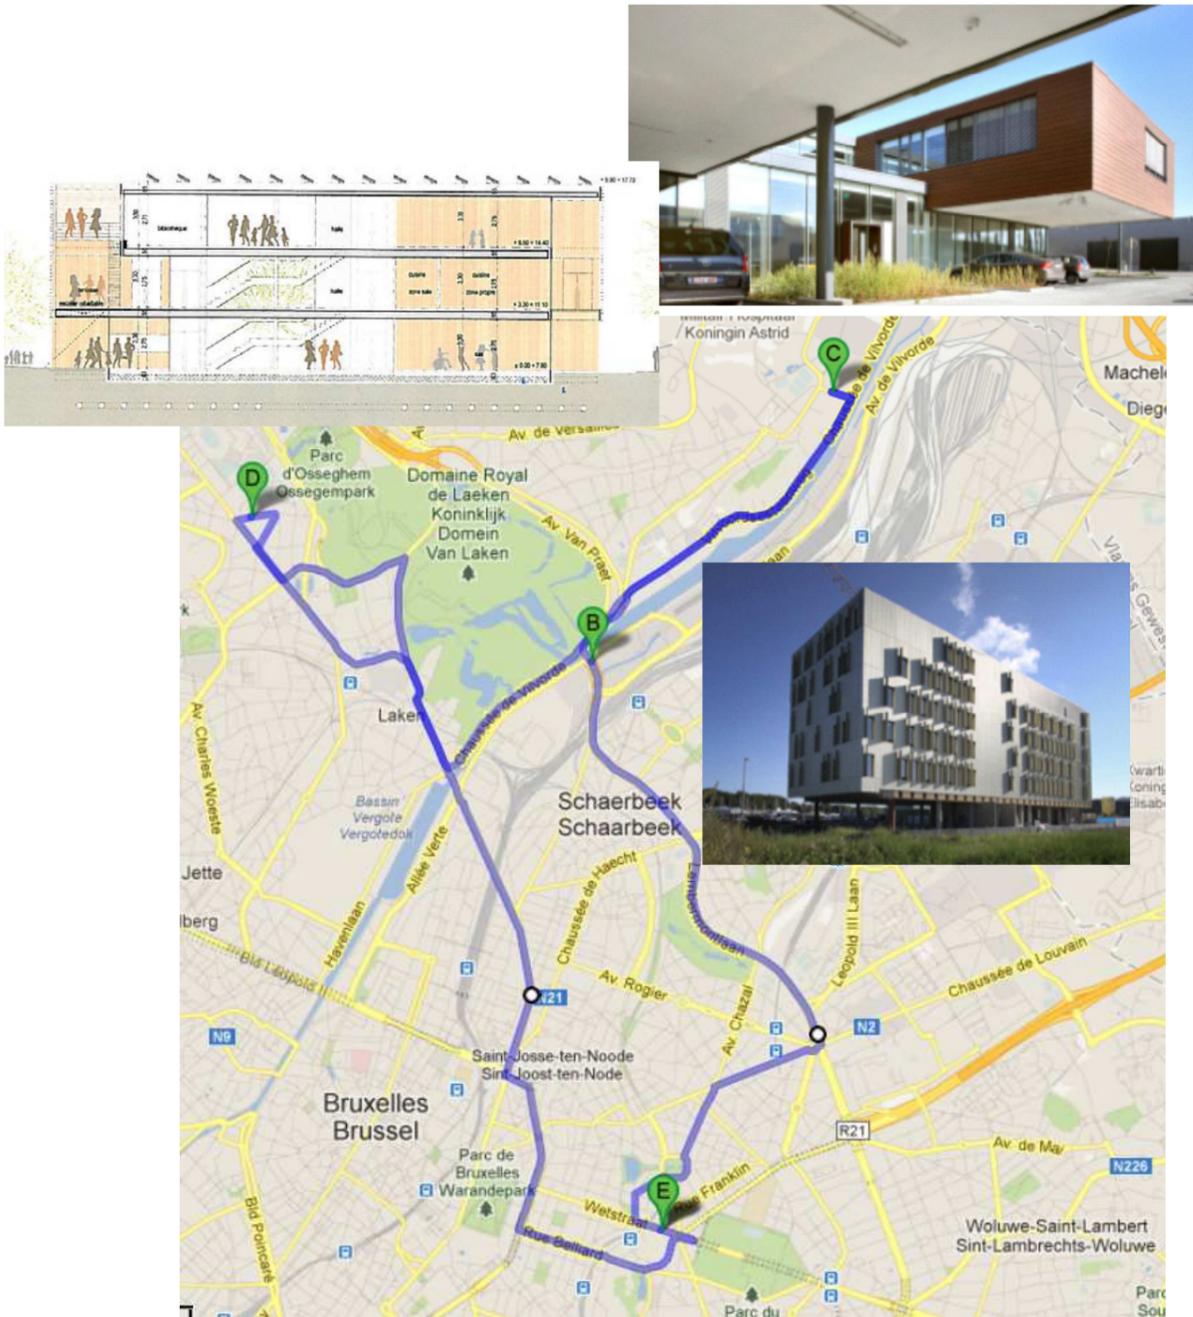

[EUSEW](#) > [Energy Days](#) > [Brussels](#)

Energy Days in Brussels

The EUSEW will take place in Brussels, Belgium and across Europe between **24 and 28 June 2013 including the weekends before and after.**

The EUSEW search engine allows you now to reinforce the visibility of each Energy Day and simplify the search.

For EUSEW 2013, Energy Day organisers have the possibility to use the EUSEW website to manage their participants and attendees, directly through their online account. People from all over Europe will therefore have the possibility to register for Energy Days they are interested in attending.

Program (day tbc):

departure Schuman (E)	09:00
<u>visit Quai Monnoyer – Elia (B) – zero energy offices</u>	09:30
<u>visit FBZ –Marly (C) – passiv offices</u>	10:30
<u>visit école Bocktsael (D) –passiv school</u>	11:30
back to Schuman (E)	13:00

In 2012 Brussels Capital Region won the Eusew award category Living thanks to his ambitious NZEB policy program.

Brussels Environment had shown during a successful study tour the enormous potential of high performances buildings in social housing.

During the Eusew 2013- Energy days, Brussels Environment in association with the IEE program PassREg would like to demonstrate how high energy efficient buildings and renewables are a successful mix to fulfill European NZEB objectives.

This will be shown through the visit of a sample of tertiary buildings (offices and school) during a half-day study tour.
