Izgradimo energetsku revoluciju

Suočena s klimatskim promjenama EU je postavila ciljeve za pokretanje energetske revolucije

Sektor zgradarstva predstavlja 40% ukupnih emisija CO₂ i ključan je za uspješnu borbu s klimatskim promjenama!

Trebamo rješenja! Pasivna kuća daje odgovore...

Pasivna kuća: baza

Pasivna kuća je baza

- Internacionalno prepoznat standard gradnje
- Primjenjiv u raznim klimatskim uvjetima i tipovima objekata
- Maksimalni komfor uz minimalnu potrošnju energije i životnog ciklusa proizvoda
- Isprobani koncept koji funkcioniše već više od 2 desetljeća
- Mogućnost testiranja projekata korištenjem Passive House Planning Package (PHPP)

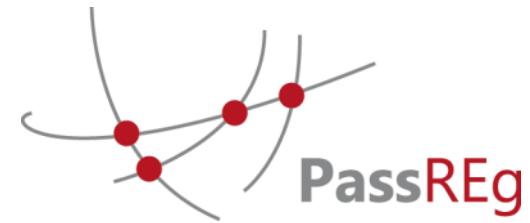

Pasivne kuće troše i do 90% manje energije od objekata izgrađenih na konvencionalan način

PassREg projekt

PassREg projekt ima za cilj promovirati

Regije pasivnih kuća i obnovljivih izvora energije

Regije koje promoviraju 'energetsku učinkovitost na prvom mjestu' primjenom standarda pasivne kuće na taj način omogućavaju obnovljivim izvorima energije da pokriju sve potrebe za energijom

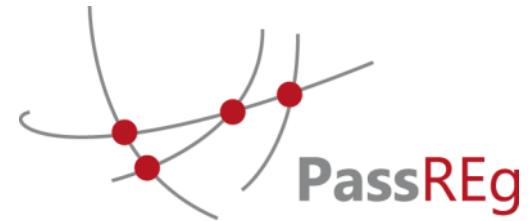

Neke regije već uspješno implementiraju koncept pasivne kuće;
Drugi još uvijek imaju dug put pred njima...

Podržati rast regija pasivnih kuća

PassREg pomaže regijama koje teže da postanu pasivne

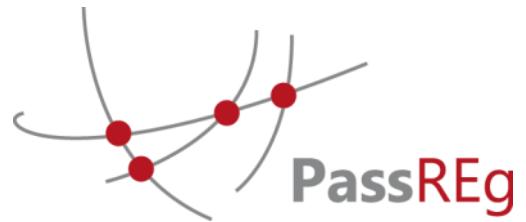

- Istražujući uspješne primjere
- Učiniti primjere poznatima i dostupnima
- Izgraditi infrastrukturu za treninge stručnjaka, osiguranje kvalitete i certificiranje
- Stimulacija tržišta za prikladne proizvode i stručnjake

- Definirati gradnju prema standardu pasivne kuće u nacionalnoj regulativi kao gotovo nultu energetsku gradnju je velika prilika i izazov za svaku zemlju u EU.
- Obvezna gradnja prema standardu pasivne kuće je efektivna ako je implementirana uz adekvatne promotivne alate.
- Težiti održivosti kroz primjenu koncepta pasivne kuće i zelenih zgrada jača industriju, stvara nova radna mjesta i jača ekonomski rast.
- Adekvatna regulativa na nacionalnom nivou pomaže, ali ne smanjuje potrebu za aktivnim uključenjem regionalnih i lokalnih vlasti.
- Uloga regionalnih i lokalnih vlasti ne može biti u potpunosti ispunjena bez uključivanja široke mreže partnera i dionika.
